LinkedIn: <http://www.linkedin.com/in/sahilmore45>
GitHub: <https://github.com/Sahilmore469>

Email: sahilmore253@gmail.com
Mobile: +91 8669133449

SKILLS

Languages: Python, R, Java, C, C++
Data Science: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, OpenCV, TensorFlow, EDA, Data Wrangling, Feature Engineering
ML & Analytics: Regression, Classification, Clustering, Decision Trees, Random Forest, NLP, Data Visualization, Statistics, Model Evaluation
Databases: SQL, MySQL, PostgreSQL
Tools/Platforms: Power BI, Tableau, Jupyter Notebook, Google Colab, VS Code, Git, GitHub, Linux, Streamlit, Vercel, Render, AWS, Cloud Computing
Soft Skills: Problem-Solving, Team Collaboration, Softskills

PROJECTS

- Student Performance Analysis & Prediction | [Github](#) Jun'26
 - Analyzed a dataset of **6,600+ students across 19 features** using EDA to identify factors driving academic performance, including study habits, parental involvement, and peer influence.
 - Built and compared two **Linear Regression models** — a core 3-feature model ($R^2 = 0.655$) and an extended 19-feature model ($R^2 = 0.825$).
 - Deployed the trained model as a full-stack web app using Flask and hosted it on Render, turning the analysis into a live, publicly accessible tool.**Tech used:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Flask, Render
- Cyber Threat Intelligence Dashboard | [Github](#) Mar'26
 - Designed a **4-page Power BI dashboard** analyzing **3,000 cybersecurity incidents** across 12 countries (2015–2024), tracking affected users and financial losses.
 - Developed **9 custom DAX measures** to identify attack frequency, hardest-to-resolve attacks, and most targeted industries
 - Built **scatter plots and KPI visualizations** to analyze resolution time vs financial loss and derive **security insights****Tech used:** Power BI Desktop, DAX, Power Query (M), Excel/CSV
- Cybercrime Motive Analysis — India | [Github](#) May'25
 - Performed end-to-end data science analysis on **Indian government cybercrime data (35 states, 8 crime motives)** sourced from data.gov.in using Python and Jupyter Notebook.
 - Built **12 visualizations** (heatmaps, bar charts, scatter plots, pairplots) using Matplotlib and Seaborn; applied Linear Regression, Random Forest Regressor, and Logistic Regression (**86% accuracy**) to predict and classify crime-risk states.
 - Identified **Maharashtra as top cybercrime state**; fraud as most influential motive via Random Forest feature importance analysis. **10 GitHub stars****Tech used:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook

CERTIFICATES

- Programming in Java – NPTEL (Elite Score: 86%) | [Certificate](#) Oct'25
- Data Analytics & Visualization: Using Excel and Python | [Certificate](#) Dec'25
- Oracle AI Database Certified Foundations Associate | [Certificate](#) Apr'26
- Deloitte job simulation involving data analysis and forensic technology | [Certificate](#) Jul'26

TRAINING

- A Guide to Machine Learning with Data Science — CipherSchools Aug'26
 - Completed a hands-on ML training program covering the end-to-end workflow — EDA, preprocessing, model building, evaluation, and deployment — and applied it by building a capstone project, **Heart Disease Prediction** ([Github](#)).
 - Trained and compared **Random Forest, Logistic Regression, and XGBoost** models on the UCI Cleveland Heart Disease dataset, selecting Random Forest for its best ROC-AUC (0.908) and 97% recall.
 - Built and deployed a **Flask web app** that serves the model live — a 13-field clinical intake form returning instant, interpretable risk predictions — served with Unicorn and deployed on Render via GitHub.**Tech used:** Python, Flask, Unicorn, Scikit-learn, XGBoost, Pandas, NumPy, GitHub, Render

EXTRA CURRICULAR ACTIVITIES

- Participated in the **Bharatiya Antariksh Hackathon (BAH) 2026**, presented by ISRO and powered by Hack2skill; built **Urban Heat Mitigation**, a geospatial AI platform using XGBoost and Physics-Informed ML to detect urban heat islands and simulate budget-optimized cooling strategies ([Github](#)). Aug'26
- Participated in **UniHack**, an AI-powered product intelligence hackathon for industrial commerce hosted by **Unilog and Hack2skill**, and built **UnilogicAI** ([Github](#)). Aug'26
- Competed in the **Adobe University Hackathon 2026**, with our team qualifying through to Round 2. Aug'26
- Solved **300+ DSA problems** across **LeetCode, Codeforces, and CodeChef**. | [Codolio](#) Aug'26

EDUCATION

- Lovely Professional University** Phagwara, Punjab Aug'24 - Present
- Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.38**
- Rotary English Medium School** Ratnagiri, Maharashtra Apr'22 - Mar'24
- Intermediate with PCM; **Percentage: 77.2**
- Rotary English Medium School** Ratnagiri, Maharashtra Apr'21 – Mar'22
- Matriculation; **Percentage: 79.40**
